THE MATERIAL

NOVOMATT is a technologically advanced and unique composite material consisting of a high percentage of natural mineral fillers and a low percentage of high-purity polyester and acrylic polymers; it is therefore an inert, hypoallergenic and non-toxic material. It is coated with an aesthetically pleasing matt technical enamel. This coating combines excellent resistance characteristics with complete restorability of the surface.

CUSTOM SHAPING

NOVOMATT plates can be cut by the installer up to 2.5cm from the edge. Novellini offers a cut-to-length and/or cut-to-width service by communicating the measurements when ordering. We also supply shower trays with cut-outs made to measure to shape the shower tray exactly to the available space. The cuts must however be straight, curved or arched cuts (**out-of-square cut up to 2.5 cm***) are not permitted. It is also not possible to cut the shower tray around the drain to an area of 40 x 40 cm.
